Fabric Overview
& Care

Made To Order & Customisation Concept

The Customisation Concept serves as an overview of the various textiles available for Nebulosa bathrobes. The materials have been handpicked so you can make our robes your own.

Zero-waste fashion is defined as a fashion design strategy that aims to reduce or eliminate textile waste during the garment production process, particularly focusing on the pattern making and cutting stages. We also keep low stock of ready-made pieces, most of our robes are made to order to avoid over production and subsequent waste. This helps our planet, while your robe will still reach you within 3 weeks. Please have a look at the most recent fabric selection, choose your favourite and drop us a line if you have any questions. Good things are worth waiting for.
